

The Questionnaire is here!

The Questionnaire Launch event on 20 May was well attended, and we received nearly 80 responses to the Key Views survey. This asked visitors to rate the importance of 12 selected views in the parish.

Visitors studying the Key Views

We applied successfully for a grant to cover the printing and online costs of the Questionnaire. The booklet is currently being printed. A team of volunteers will deliver it to all households in Woolpit between 15 and 23 June. They will call again to collect completed Questionnaires between 9 and 15 July. If for any reason you can't manage to do the Questionnaire by then, it can still be completed up to 1 September. You can bring the booklets back to collection points at the Health Centre or at Elm Tree Gallery, the gift shop in the village centre.

An online version has been created at

<http://www.smartsurvey.co.uk/s/woolpitnpq/>

so that you can complete the Questionnaire at your computer, if you prefer. This is also for other members of every household to have their say, as they may have differing opinions about some matters!

People who don't live in Woolpit but work on the Business Parks can also use the online survey.

Don't miss this opportunity to have your say about the future of Woolpit!

A Landscape Sensitivity Study

The iconic view of the church tower and spire, seen from Rags Lane, was the most valued Key View. Entering the village along Green Road, and the view from Bury Road towards Elmswell church, claimed the runner-up places. Our thanks to Chris Brooks, who took the photos. The full analysis of the survey can be found on the Neighbourhood Plan webpages.

The results of the Key Views survey will be forwarded to a consultant, who will analyse the impacts development would have on different areas of land around the village. The specification for this Landscape Sensitivity Study has already gone out to tender with three consultants. When we receive their bids, we intend to apply for a grant to fund the study.
